PhD Student in Crop Genetics and Breeding

Bio. I am currently a 3rd-year PhD Student at College of Agriculture and Biotechnology, Zhejiang University (ZJU), Hangzhou, China, working with Prof. Lixi Jiang on Crop Genetics and Breeding.

Research interests. My Ph.D research work covers a range of issues : **Population Genetics Evolution and Ecotype Divergence Analysis of Brassica napus L, Genome-wide Association Study (GWAS) of Agronomic Traits**. Currently, I am interested in Transposable Elements Insertion Polymorphisms (TIPs) in Crop Population and genetic basis such as SV, CNV and TIPs etc shapes the diversity of different morphotypes of *B.napus*.
